### Backdrop

Data analysis is one of the crucial steps in making interpretations & informed decisions about the findings of the study. It allows to extract meaningful insights from raw data, validate hypothesis, draw informed conclusions and contribute to the advancement of knowledge within their field. It helps in transforming the collected data into functional and actionable explanations, supporting evidence based decision making & problem solving. Thus, it plays a pivotal role in drawing interpretable results on specific data. This can be effectively and efficiently carried out by using digital tools. In this backdrop, one week national faculty development programme is being organized with an intent to develop competencies related to using & applying various digital tools for data analysis.

### Objective

The objectives of this programme are:

- to acquaint with the various data analysis digital tools viz. Excel, Qualtrics etc.
- to give insight into the process of using various data analysis digital tools.
- to develop skills related to intelligent use of digital tools for analyzing the data.
